**M**AYPOLE MOTORS of Surbiton Surrey have recently taken delivery of two brand new 7.5 tonne Mitsubishi Canter Crew Cabs fitted with Aluminium Predator Slidebeds build by well-known Andover based J & J Conversion to enhance their fleet. These are superb vehicles with an extremely high payload of 3000kg which are excellent for town work but also have capacity to cope with 4 wheel drives and light commercials.

Maypole Motors have been trading successfully for some 35 years having been established in 1976. During that time they have expanded from modest beginnings, growing from a small recovery and service garage employing three staff members to what is today – a large and vibrant motor group employing in the region of forty-five people.

Paul and Darren Sparks of Maypole Motors have always had an excellent working relationship with J & J and have bought all their vehicles from

them since 1987, Paul points out “The service back-up we get from J & J and the quality of product is second to none and when you look at what you get for your money it is also excellent value too”.

J & J are delighted to have supplied Maypole Motors with their new vehicles and wish them continued success for the future.

## MAYPOLE CELEBRATE 35 YEARS OF BUSINESS WITH J&J
